

Discord Notifications - 500 USDC

Once a loan position is about to get liquidated, the loan taker should get Discord notification(s) about it happening soonish to prevent unwanted liquidation. Basically matching user's wallet with discord id from Matrica

Based on:

- Matrica API
- Loans public data (Vybe GraphQL or frakt API)

Advanced: Right now liquidations are happening only with missing paying in time, later liquidations might happen based on NFT price on market

Please contact @0xlarry#9659 on Discord with all questions
